

The ultimate coffee lifestyle.

Turn your coffee moment into the best time of the day. Siemens fully automatic espresso machines fit your lifestyle, for an exceptional coffee moment any time.

Choose your perfect fully automatic espresso machine.

Experience the ultimate personalised enjoyment of coffee with the Siemens EQ range of fully automatic espresso machines. Distinctive Siemens design, with state-of-the-art engineering. From the entry-level model to the fully networked bean-to-cup coffee machine, there is a model to suit your lifestyle.

EQ 9 plus: The ultimate.

Perfect coffee, tailored to your taste, every time. The EQ 9 plus fully automatic espresso machine lets you customise every part of creating your ideal coffee. With a wide range of preparation options and innovative features including baristaMode and the option of Home Connect, the EQ 9 plus gives you the freedom of high-tech solutions for a high-end coffee.

- You want to customise every element of your coffee like a barista.

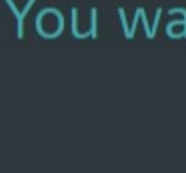

There are five essential parameters of baristaMode that contribute to the quality of coffee and Espresso: coffee strength, amount, temperature, coffee-to-milk ratio and brewing speed. By switching to the baristaMode, you can make even finer, fully customised adjustments to please any coffee taste. This optimised setting lets you celebrate the fine art of coffee preparation.

- You want to share your coffee experience and prepare a second cup at the touch of a button.

Whether it's a strong espresso, a creamy Cappuccino, a Latte Macchiato, or a Viennese Melange: you can now make two of every creation with just one press on the button. Your fully automatic espresso machine adjusts everything itself and prepares two drinks at the same time for you and your guests.

- You want to enjoy coffee specialities with milk, without worrying about cleaning the EQ 9 plus.

The preparation of really good, aromatic coffee specialities is a delight – cleaning the milk system isn't. Which is why Siemens developed autoMilk Clean. This fully automatic steam cleaning system activates after every drink, ensuring perfect hygiene and relieving you of having to clean the milk system every day. Milk residue simply doesn't get a chance to develop – allowing you to just sit back and enjoy a great cup of coffee.

- You want to experience Siemens' quietest automatic espresso machine.

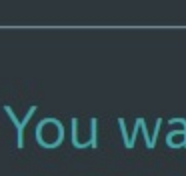

Now you can even enjoy the coffee preparation in peaceful tranquility. The machine's refined engineering with optimised soundproofing enables a remarkable noise reduction – making the EQ 9 plus fully automatic espresso machine the quietest that Siemens has to offer.

- You want to connect your automatic espresso machine to your phone.

Access and control your coffee maker, no matter where you are – with the easy-to-use Home Connect App. Available only on selected EQ 9 plus fully automatic espresso machines.

- You want to enjoy different types of coffee beans.

With the dualBean System, it's simple to prepare the desired coffee creation in your fully automatic espresso machine with the right beans. Two separate coffee bean containers, each with its own grinder, ensure that your beans never get mixed up. Guaranteeing that the desired flavour will always be achieved. Available only on selected EQ 9 plus fully automatic espresso machines.

EQ 6 plus: Blend to perfection.

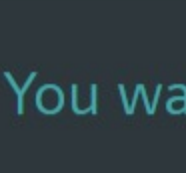

Prepare a diverse selection of coffee variations and milk specialities, to match your mood and taste. Whether it's an Americano, Latte Macchiato, Caffé Crema or a Flat White, the EQ 6 plus fully automatic espresso machine gives you endless options, for that special coffee moment any time. You can even simply save your favourite beverage.

- You want to personalise your coffee break and always have your favourites available.

Your favourite coffee on demand. With favourites, you can save up to four coffee selections. Just choose your individual strength, size, temperature and the amount of milk you prefer for your coffee, once, and save it as your favourite beverage.

- You want your coffee experience to start as soon as you turn on the machine.

Switch on and enjoy. Thanks to the coffeeSelect Display, the perfect coffee experience starts the moment you switch on the machine. The large user interface presents an inviting selection of international aromatic coffee and milk specialities. Thanks to its intuitive use concept, all functions can be accessed directly just by touching the sensor controls – making the simple act of preparing a coffee a unique experience.

- You want to enjoy coffee specialities with milk, without worrying about cleaning the EQ 6 plus.

Anyone who has a passion for really good, aromatic coffee will go to almost any length to prepare it well. But nobody wants to waste time cleaning the milk system. Which is why Siemens developed autoMilk Clean. This convenient fully automatic steam cleaning system cleans the milk system after every drink, ensuring perfect hygiene day after day.

- You want to prepare two cups at the touch of just one button.

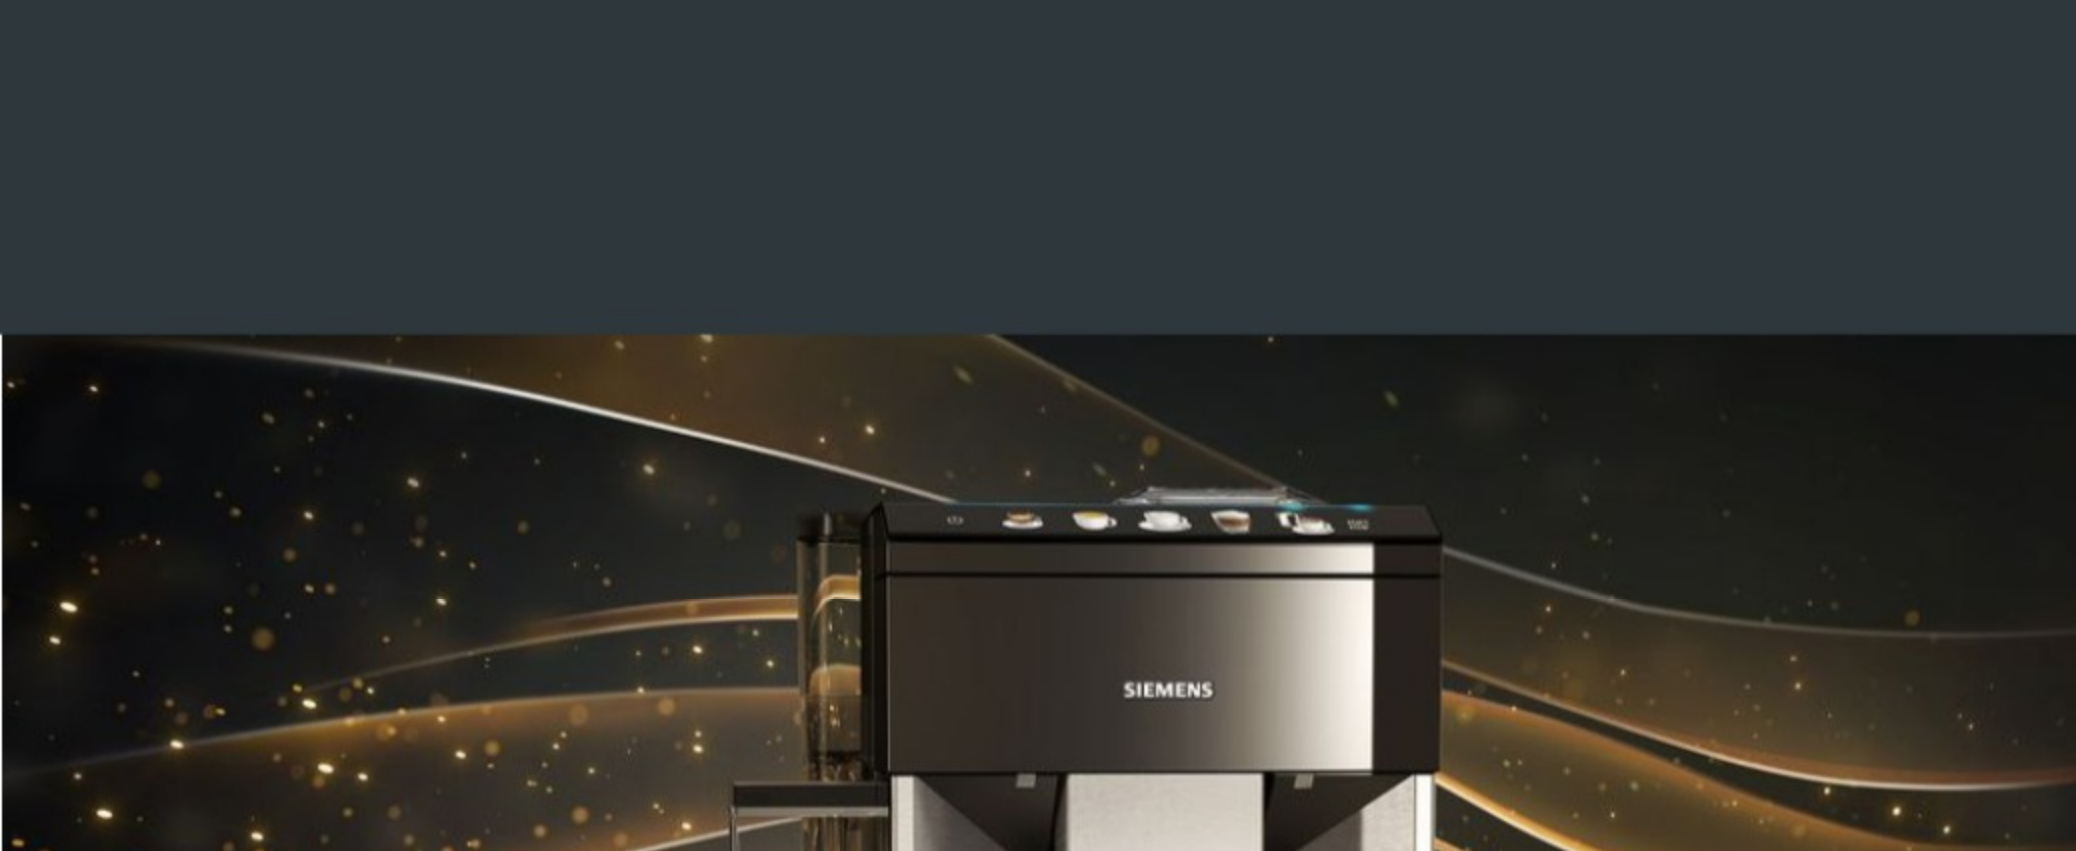

Espresso, a creamy Cappuccino, a Latte Macchiato or a Caffé Latte. With oneTouch DoubleCup, your beverage is prepared at the simple touch of a button. If you wish, you can also prepare two cups at the same time. Available only on selected EQ 6 plus fully automatic espresso machines.

EQ 500: Superior preparation made easy.

Distinctive state-of-the-art design. The new EQ 500 fully automatic espresso machine guarantees surprisingly pleasurable coffee preparation thanks to the innovative and user-friendly colour coffeeSelect Display. The EQ 500 series offers two different milk system solutions. The EQ 500 integral has a large integrated milk container. With the EQ 500 classic, the milk is foamed directly in the cup with the help of the cappuccinator.
