sensoFresh in detail.

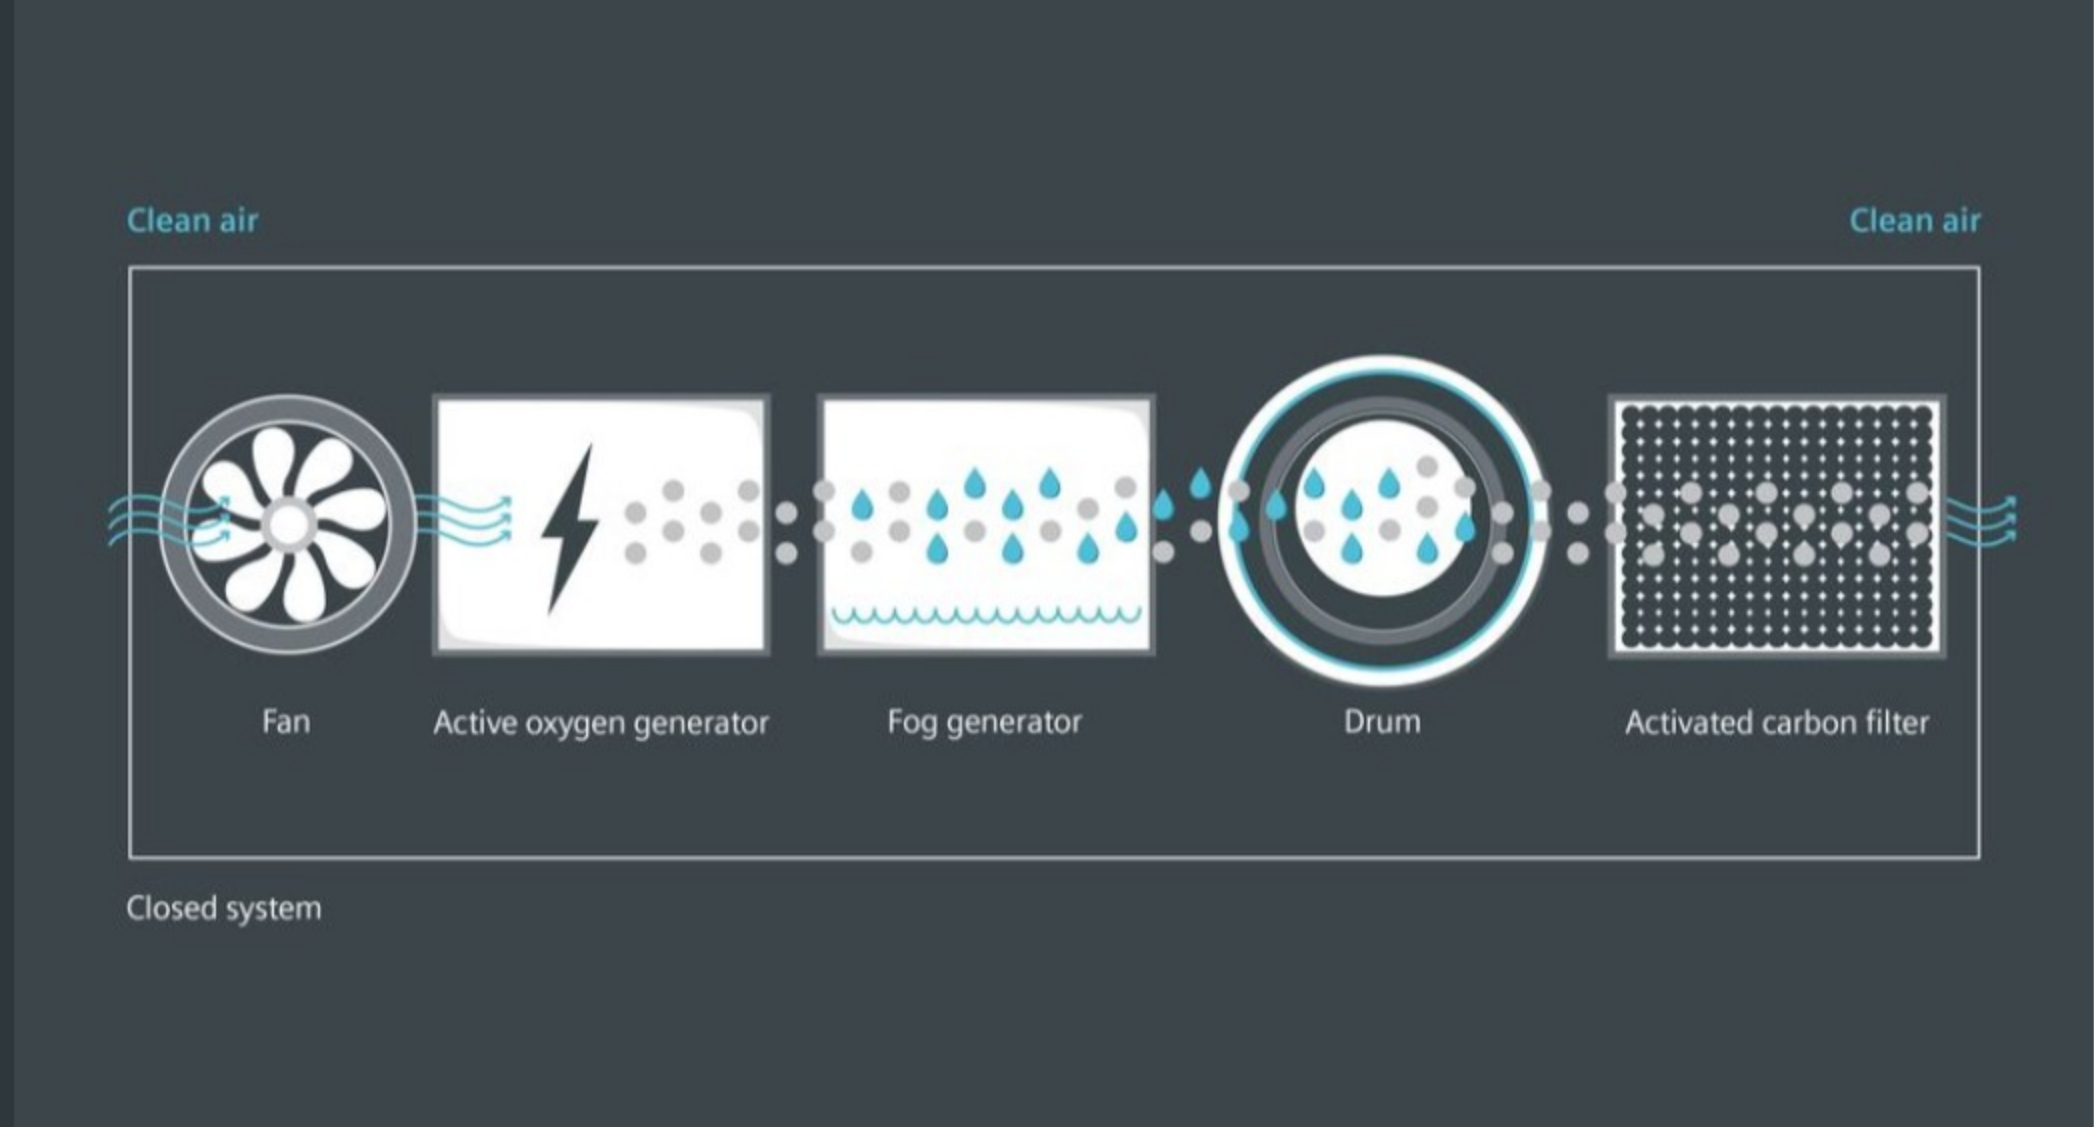

- Sensitive fabrics including silk, cashmere and wool and non-washable clothes can be refreshed at home with sensoFresh.
- Using active oxygen, sensoFresh breaks down unpleasant odours, removing them gently and effectively.
- Instead of time-consuming trips to the dry cleaner, sensoFresh refreshes sensitive fabrics in only 30 minutes.

Result: Your clothes are refreshed and ready to wear, whenever you need them.

**The innovative sensoFresh programme.**

sensoFresh uses active oxygen to remove odours, gently refreshing clothes. The sensoFresh programme does not require detergent or chemicals and is suitable for sensitive, non-washable and dry clean-only fabrics.

**How it works.**

A natural gas, active oxygen is generated by the washing machine from oxygen in the air. The sensoFresh programme generates fog to pre-treat the clothes and the active oxygen removes and permanently destroys the odours. The neutralised odours and residual active oxygen are transported by a stream of air to the activated carbon filter, and converted to clean air. The result, odour-free clothes refreshed without washing.

Independent wfk Institute certifies sensoFresh.

The renowned wfk - Institute for Applied Research GmbH confirms a "significant reduction of bad odours due to the treatment in the sensoFresh programme with activated active oxygen function at both intensity levels". Investigation WL 7622F/15 of the wfk - Institute for Applied Research GmbH on six different ready-made textiles with applied bad smells (tobacco smoke, fat / onion, artificial food odours).

**Discover the sensoFresh range of washing machines.**

Selected Siemens washing machines feature the revolutionary sensoFresh programme, to refresh almost any type of fabric without washing.
